Election/Restriction

1. Claims 13-14 are withdrawn from further consideration by the Examiner, 37 CFR 1.142(b) as being drawn to a non-elected invention. Election was made **without** traverse in Paper No. 4.

2. Applicant's election without traverse of Group I in Paper No. 4 is acknowledged.

Parent Application

3. Applicant should note the disposition of the parent application.

Claim Rejections - 35 U.S.C. § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by McIntire et al 5,281,799.

McIntire et al discloses the claimed card display package including a card carrier 11 of a sheet of material, a card 16 connected to and selectively detachable from the card carrier, the card having an encodable magnetic strip 38 extending transversely across the portion of the card. Note that the card may be

sent through an encoding device without being removed from the card carrier.

See column 8, lines 5-61.

Claim Rejections - 35 U.S.C. § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 3-6 and 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over McIntire et al, as used above.

McIntire et al discloses the claimed card display package including a card carrier which is a sheet of transparent material except for the sheet of material to be a synthetic paper or the sheet to be laminated on both sides with a plastic material or having an aperture for suspending the card carrier from peg. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the sheet of material of McIntire to include a synthetic paper or the sheet to be laminated on both sides with a plastic material or having an aperture for suspending the card carrier from peg since Applicant has not disclosed that a synthetic paper or the sheet to be laminated on both sides with a plastic material or having an aperture for suspending the card carrier from peg solves any stated

problem and the invention would perform equally as well as the card display package of McIntire et al.

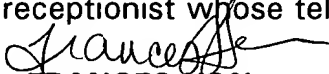

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

9. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXING of responses to Office Actions directly into the Group at (703)305-3579. Transmissions can be received from the Applicant at all times. This practice may be used for filing papers not requiring a fee. The faxing of such documents must conform with the notice published in the Official Gazette, 1096 OG 30 (October 19, 1988). Please identify the Examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the Examiner.
